"NEW" ONLINE TEEN COURSE

Now you can get your online classroom and behind-the-wheel sessions all in one convenient package. It works just like our other classroom packages, except for your online course, you can log in and take your class from anywhere at any time! When you're finished, you'll be eligible to start your behind-the-wheels with us right away. We offer the following packages, one that includes all your needed behind-the-wheel and observation hours, and one that includes just the online course only, in case you need to complete your behind-the-wheels at a later date or are not located close enough to do that with us.

HOW AND WHEN TO BEGIN

In addition to our enrollment confirmation e-mail, you will receive an additional welcome email for the online course that will instruct you to confirm your email address and set up your password to access the course. After confirming your email address and setting up your password, you may log in from then on at any time to complete your course lessons.

Please note that the link in your welcome email will expire, so please take the time to set up your account completely as soon as possible (you can always do a password reset to complete the process at a later time if it does expire).

WHEN YOU FINISH

Upon completing your online class, you may contact us for next steps to register for behind-the-wheels (if you have purchased the Online Only package, you may go to another driving school to complete this if you are unable to continue with us). If you purchased the Complete Online package, your 6 hours of behind-the-wheel and 6 hours of observation are already included in your purchase, otherwise you will have to purchase those separately from us if you purchased the Online Only package.

ABOUT THE CLASS

Upon registering for your package, you will be officially enrolled with Wallace's One Way Driving School and automatically enrolled in the online class. We've partnered with Teach Safe, a platform that offers tools to build web-based driver education and related content, to develop our very own online course using our classroom content and expertise to deliver you the same information you will find in our physical classrooms.

HOW THE CLASS IS PRESENTED

The course is divided into 30 lessons, each 1 hour in length (you may complete up to two lessons/2 hours in a single day, as mandated by state regulations), with a test at the end of each lesson. You must pass the test to complete the lesson and move on to the next. Once all lessons have been completed, you will also be presented with a final test, which must be completed and passed to complete the entire course.
